1. ODD EVEN

CODE:

```
<Window xmlns="https://github.com/avaloniaui"
        xmlns:x="http://schemas.microsoft.com/winfx/2006/xaml"
        x:Class="NumberChecker.MainWindow"
        Title="Odd or Even Checker"
        Width="500"
        Height="350"
        Background="LightYellow">

    <StackPanel HorizontalAlignment="Center"
                VerticalAlignment="Center"
                Width="300"
                Spacing="15">

        <TextBlock Text="Odd or Even Checker"
                    FontSize="28"
                    FontWeight="Bold"
                    Foreground="Black"
                    HorizontalAlignment="Center"/>

        <TextBlock Text="Enter a number:"
                    FontSize="18"
                    FontWeight="SemiBold"
                    Foreground="Black"/>

        <TextBox x:Name="txtNumber"
                 FontSize="18"
                 Height="40"
                 Foreground="Gold"
                 Background="White"/>

        <Button x:Name="btnCheck"
                Content="Check Number"
                FontSize="18"
                FontWeight="Bold"
                Height="45"
                Background="Gold"
                Foreground="Black"
                Click="btnCheck_Click"/>
```

```
<TextBlock x:Name="lblResult"
    Text="Result will appear here"
    FontSize="18"
    FontWeight="Bold"
    Foreground="Black"
    HorizontalAlignment="Center"
    TextWrapping="Wrap"/>

</StackPanel>

</Window>
```

2. POSITIVE NEGATIVE

CODE:

```
<Window xmlns="https://github.com/avaloniaui"
        xmlns:x="http://schemas.microsoft.com/winfx/2006/xaml"
        x:Class="NumberChecker.MainWindow"
        Title="Positive or Negative Checker"
        Width="500"
        Height="350"
        Background="LightYellow">

    <StackPanel HorizontalAlignment="Center"
```

```
        VerticalAlignment="Center"
        Width="300"
        Spacing="15">

        <TextBlock Text="Positive or Negative Checker"
            FontSize="28"
            FontWeight="Bold"
            Foreground="Black"
            HorizontalAlignment="Center"/>

        <TextBlock Text="Enter a number:"
            FontSize="18"
            FontWeight="SemiBold"
            Foreground="Black"/>

        <TextBox x:Name="txtNumber"
            FontSize="18"
            Height="40"
            Foreground="Gold"
            Background="White"/>

        <Button x:Name="btnCheck"
            Content="Check Number"
            FontSize="18"
            FontWeight="Bold"
            Height="45"
            Background="Gold"
            Foreground="Black"
            Click="btnCheck_Click"/>

        <TextBlock x:Name="lblResult"
            Text="Result will appear here"
            FontSize="18"
            FontWeight="Bold"
            Foreground="Black"
            HorizontalAlignment="Center"
            TextWrapping="Wrap"/>

    </StackPanel>

</Window>
```

Positive or Negative Checker

Positive or Negative C

Enter a number:

Check Number

-5 is a negative number.

Positive or Negative Checker

Positive or Negative C

Enter a number:

Check Number

18 is a positive number.

Ps. Sorry po Miss Gen if my work is kind of different because i used different extension po since i am using a Macbook. Thank you po for understanding.
