ISPRGG2
ANSWER SHEET
Term 3 AY 2025 - 2026

Name: NAVAL, Julia Marie P.	SCORE: ____ / 40
Section: BFIS02	Date: Sep 3, 2026

1. Student Information

Ask the user for their name, course, year level, and section, then display all information.

```
Programiz
C# Online Compiler

Main.cs Run Output

1 using System;
2
3 class Program
4 {
5     static void Main()
6     {
7         Console.Write("Enter your name: ");
8         string name = Console.ReadLine();
9
10        Console.Write("Enter your course: ");
11        string course = Console.ReadLine();
12
13        Console.Write("Enter your year level: ");
14        string yearLevel = Console.ReadLine();
15
16        Console.Write("Enter your section: ");
17        string section = Console.ReadLine();
18
19        Console.WriteLine("\n == Student Information == ");
20        Console.WriteLine("Name: " + name);
21        Console.WriteLine("Course: " + course);
22        Console.WriteLine("Year Level: " + yearLevel);
23        Console.WriteLine("Section: " + section);
24    }
25 }
```

Enter your name: Julia Marie P. Naval
Enter your course: BS in Information Systems
Enter your year level: Sophomore Year
Enter your section: BFIS02

== Student Information ==
Name: Julia Marie P. Naval
Course: BS in Information Systems
Year Level: Sophomore Year
Section: BFIS02

ANSWER SHEET
Term 3 AY 2025 - 2026

2. Basic Calculator

Ask for two numbers and display their:

Addition

Subtraction

Multiplication

Division

The screenshot shows the Programiz C# Online Compiler interface. The code in the editor is as follows:

```
1 using System;
2
3 class Program
4 {
5     static void Main()
6     {
7         Console.Write("Enter first number: ");
8         double num1 = Convert.ToDouble(Console.ReadLine());
9
10        Console.Write("Enter second number: ");
11        double num2 = Convert.ToDouble(Console.ReadLine());
12
13        Console.WriteLine("\n == Calculator ==");
14        Console.WriteLine("Addition: " + (num1 + num2));
15        Console.WriteLine("Subtraction: " + (num1 - num2));
16        Console.WriteLine("Multiplication: " + (num1 * num2));
17
18        if (num2 != 0)
19            Console.WriteLine("Division: " + (num1 / num2));
20        else
21            Console.WriteLine("Division: Cannot divide by zero.");
22    }
23 }
```

The output on the right side of the compiler shows the execution results:

```
Enter first number: 20
Enter second number: 5

== Calculator ==
Addition: 25
Subtraction: 15
Multiplication: 100
Division: 4

=== Code Execution Successful ===
```

Term 3 AY 2025 - 2026

3. Area of a Rectangle

Ask for the length and width. Calculate and display the area.

Formula:

Area = Length x Width

The screenshot shows the Programiz C# Online Compiler interface. On the left, the code editor displays a C# program named 'Main.cs'. The code prompts the user to enter length and width, calculates the area, and displays the result. On the right, the 'Output' panel shows the execution results, including the user input and the calculated area.

```
1 using System;
2
3 class Program
4 {
5     static void Main()
6     {
7         Console.Write("Enter length: ");
8         double length = Convert.ToDouble(Console.ReadLine());
9
10        Console.Write("Enter width: ");
11        double width = Convert.ToDouble(Console.ReadLine());
12
13        double area = length * width;
14
15        Console.WriteLine("\nArea of Rectangle: " + area);
16    }
17 }
```

Output

```
Enter length: 50
Enter width: 50

Area of Rectangle: 2500

=== Code Execution Successful ===
```

ANSWER SHEET
Term 3 AY 2025 - 2026

4. Student Grade

Ask for three grades (Prelim, Midterm, Final). Calculate and display the average.

Formula: $\text{Average} = (\text{Grade1} + \text{Grade2} + \text{Grade3}) / 3$

The screenshot shows the Programiz C# Online Compiler interface. The code in the editor is as follows:

```
1 using System;
2
3 class Program
4 {
5     static void Main()
6     {
7         Console.Write("Enter Prelim grade: ");
8         double prelim = Convert.ToDouble(Console.ReadLine());
9
10        Console.Write("Enter Midterm grade: ");
11        double midterm = Convert.ToDouble(Console.ReadLine());
12
13        Console.Write("Enter Final grade: ");
14        double finalGrade = Convert.ToDouble(Console.ReadLine());
15
16        double average = (prelim + midterm + finalGrade) / 3;
17
18        Console.WriteLine("\nAverage Grade: " + average);
19    }
20 }
```

The output window shows the following text:

```
Enter Prelim grade: 95
Enter Midterm grade: 96
Enter Final grade: 96

Average Grade: 95.6666666666667

=== Code Execution Successful ===
```

5. Boolean Input

Ask the user:

Are you a student? (true/false)

Store the answer in a bool variable and display it.
